Abstract

The objective of this project is based on the School Management system of Vavuniya Central College located in Vavuniya district. This project helps to above School implement a new system for facilitating of the Student information work make easier.

The project proposed, intends to create a School Management system which is maintaining many details related to Students; such as Students and Teachers details, Revenue School details, Report, etc. The computerized system manages the Student details professionally. **Keeping track** of records of all day today activities done by administrator and retrieving, manipulating and storing data would be maintained through the database. It would make possible searching the past records and generating the required reports. These facts are carrying out an efficient service with reduction of work load.

All the interfaces are user friendly, The School Management system project including the C Sharp (C#) programming language of main function focus on the user interface development.
