ABSTRACT

Drugs Inventory Control System application is to help store in charger to manage drugs in a systematic ways. The stock of drugs is needed to be updated then and there in order to provide information about stock level, availability of stock and usage of drugs. The Drug Inventory Controller has been managing the drugs in system manually and carried a number of problem regards the drugs. The management that led to identify the expired drugs, appropriate level of drugs . Therefore, the computerized system has developed to solve the problems and this Drug Inventory System is believed to help the inventory controller and Doctor of the hospital to maintain the drugs more successfully.
