ABSTRACT

The Computer Business System (CBS) is one of the popular institutions of Puttalam district .It has more than 400 students and 25 staff. It has been educational services to Puttalam district for nine years. The CBS is re-counting a manual of producers. It is managing the educational activities.

This system can display particular student's details through retrieving data from database. This system only created for CBS Kalpitiya branch so it cannot gain particular CBS branches student's details

It is consuming more time to retriew Students past and current record. It is maintaining record manually. To achieve the objectives, we have used the waterfall model as a software development process model as software develop the web based application interview and documentation also used the major data collection techniques. By the end of this document, interfaces for users are design with asp.net, and listed in the interfaces glossary subsection, finally, conclusion and recommendation are facilitate the usage and further improvement of this application.
