ABSTRACT

This system has been created to manage sales of Semak Juice Company. The system allow the authorized user to enter company sales, details of customer, employee, and salesman, find orders, monthly sales and enter new orders. Also give the easiest way to retrieve and delete the data from the database.

I have used Microsoft Visual Studio 2010 to design the interface of the system and Microsoft Access 2007 for database development. Furthermore Visual C# 2010 has been utilized for code generation.

It is a desktop based system. It requires Operating System: Windows XP SP3 (All editions except Starter), Windows Vista SP2 (All editions except Starter), Windows 7 and .Net Frame Work.

I hope the system will fulfill all the expectation of the client organization.
