ABSTRACT

As IT students our main responsibility is to introduce new technologies or modify an existing System. I develop this Online Car Rental System website to Enhance Efficiency, Effectiveness, and responsiveness and reduce the work load of a SR Travels.

Website is a collection of web pages. Web pages are presentation of information which can be presented using a carefully chosen media most appropriate for your content. In order to deign these pages I have used special tools and techniques such as,

- Adobe Photoshop CS for image editing purpose.
- XAMP Technologic
- Macromedia Flash to animate images and texts
- Php and My SQL
- Macromedia Dreamweaver to design the web pages.

Websites are mainly categorizes into two main types.

- Commercial website.
- Non-Commercial website.

Due to the requirement of the SR Travels, I have developed an eye-catching, user-friendly, and commercial use website. Special feature of this website is that it has secure online reservation cars.
