CHAPTER 1: INTRODUCTION

1.1. INTRODUCTION

Virtually all countries now depend on complex Computer based system. National infrastructures and utilities rely on computer based system and most electrical products include a computer and controlling software. Industrial manufacturing and distribution is completely computerized as is the financial system. Therefore producing and Marinating Software cost effective is essential for the functioning of national and international economics.

Bride and Groom Information System automated system which includes details of bride and bride grooms who are going to wedded. All the works and Activities are computerized in future. It is easier and make every activities very effective than manual system work. Manual system we want to do lots of works and also want to most of users and manual things. So computerized system work is very easy and also effective than manual system.

We can use Visual Studio 2010 and SQL Server 2008R2 to developing this system. And this chapter clearly defines Background Studies, Aim, and Objective etc.

1.2. BACKGROUND STUDIES

1.2.1History of company

This project mention about groom and bride information System of RiviSada Wedding Service. The RiviSada wedding services organization is one of the famous organizations of that kind in Southern Province. Their main activity is matching couple and helps them to identify the correct person matching ones diseurs.

The RiviSanda Wedding management center was established in 1985, since then the wedding center has given a great service to the people lives in Sri Lanka. Up to now the organization has match more than 10,000 couples.

The founder was the organization Mr.Mendis he was one of the famous match maker, after that his son Mr.D.Mendis expand their branches island wide.
